Summary

Tech enthusiast at NIIT University, diving deep into cybersecurity, Web3 and blockchain while crafting clean code in Python and operating Linux. Currently leveling up with ethical hacking, learning C++ and aiming for Google Summer of Code. Building my digital footprint one commit at a time on GitHub.

I believe in taking initiative and seeing things through. My goal? To push technological boundaries and leave a lasting impact - starting with NIIT and beyond. Think of me as a sponge for knowledge with an insatiable appetite for innovation.

Let's connect and build something amazing together! Open to internship opportunities where I can contribute and grow.
